Report Illicit Discharges to Streams and Storm Sewers

Signs of an illicit discharge:

- ***Oil, antifreeze and household chemicals dumped down a storm sewer***
- ***Make-shift pipes or hoses coming from a home or business to a creek***
- ***Foul-smelling and off-color streams and waterways***
- ***Dead fish and other wildlife in a water body***

These pollutants can be harmful to human health as well as for wildlife and water quality. Report any suspected illicit discharge to your municipality at (phone, email, website)
