AN EXELON COMPANY

September 2024

Dear Customer:

At PECO, we are committed to providing safe and reliable energy for our customers and the communities we serve. As part of our work, we will be upgrading and installing new equipment to enhance the local electric distribution system in Kennett and East Marlborough Townships.

This project is part of PECO's Reliability & Resiliency Plan to invest \$1.36 billion through 2025 on targeted reliability-focused infrastructure investments. These accelerated investments will help strengthen the local electric infrastructure to better withstand more frequent and damaging storms, deliver enhanced reliability for our customers, and enable the adoption of clean energy resources. This plan is part of the company's overall system investment of approximately \$6 billion during the next five years across our electric and natural gas systems to inspect equipment, complete targeted system enhancements and corrective maintenance, invest in new equipment, and perform vegetation management.

**About the project:**

- More than \$500K will be invested to enhance the local electric distribution system for you and your neighbors.
- Construction is expected to start early October 2024.
- Approximately 2950 feet of underground cable and conduit will be replaced.
- Work may also include vegetation management as well as replacing transformers and other equipment as needed.
- The majority of this work will occur on area sidewalks and streets.
- Work will occur along W Johnathan Ct, E Johnathan Ct, E Thomas Ct, W Thomas Ct, S Orchard Ave, and Orchard Ave.
- Work will occur from 7 a.m. to 5 p.m., Monday through Friday.
- The work will be performed by a qualified PECO contractor and is estimated to be completed by January 31, 2025.

Crews may need to temporarily interrupt service to safely complete some of this work. We will work with local residents to ensure they are informed in advance of our activities and any planned interruptions. To ensure that you receive all outage updates, please confirm that your phone number is accurate in our system through MyAccount at [www.peco.com/myaccount](http://www.peco.com/myaccount) or by calling 1-800-494-4000.

We will also work closely with local officials to minimize the impact on traffic and pedestrians whenever possible. Access for services such as trash removal, student transportation and emergency vehicles will be maintained during construction.

We are dedicated to keeping you informed about our work, listening to your input, and modifying plans based on your feedback when possible.

If you have any questions regarding the details of this project and how it may impact you, please contact Patricia Haug, Customer Liaison, at [Patricia.Haug@exeloncorp.com](mailto:Patricia.Haug@exeloncorp.com).

Sincerely,

Courtney Allen  
Director, Regional Electric Operations, PECO
