PROPERTY OWNER'S CERTIFICATION AND INDEMNITY

Re:

Name

Address

Tax Parcel #

I/we the undersigned property owner(s), to whom a building permit has been issued by the East Marlborough Township for the construction of a building/accessory on the above captioned property, hereby verify that the building/accessory will be constructed pursuant to the said building permit. At the time an application for certificate of occupancy is being made, this certification confirms the building/accessory has been constructed strictly in accordance with the Pennsylvania Uniform Construction Code and its Amendments.

The undersigned further agree(s) to indemnify East Marlborough Township and Township officials and employees and save them harmless against any claim for any personal injury, property damage, or any other claim whatsoever which may at any time be brought against them in which it is alleged that the said building was not constructed in accordance with the said code, and/or that representatives or officials of East Marlborough Township negligently or improperly failed, in inspecting the said building, to observe, uncover or find any defective conditions, including but not limited to noncompliance with the said code: This indemnity includes reimbursement of attorney's fees and court costs.

The undersigned understand(s) that the statements herein are made subject to the penalties of 18 PA C.S.A. Section 4904 relating to unsworn falsification to authorities.

Date

Property Owner

Contractor

Workers' Compensation Insurance Coverage Information
(Addendum to building permit application)

A. The Applicant is:

Name of Applicant _____

Address _____

A contractor within the meaning of the Pennsylvania Workers' Compensation Law

Yes No
If the answer is "yes", complete Section B & C below as appropriate

B. Insurance Information

Federal or State Employer Identification No. _____

Applicant is a qualified self-insurer for workers' compensation
Certificate attached _____

Name of Workers' Compensation Insurer _____

Workers' Compensation Insurance Policy No.
Certificate attached _____

Policy Expiration Date _____

Applicant must supply East Marlborough Township with a Workers' Compensation Certificate, which includes the effective date of the coverage and the signature of the insurer. This certificate shall be kept on file with the building permit.

I verify that my responses to these questions are true and correct to the best of my knowledge, information and belief. I understand that false statements herein are subject to the penalties of 18 Pa. C.S.A., Section 4904 relating to unsworn falsification to authorities

Signature of Applicant

C. Exemption

Complete Section C if the applicant is a contractor claiming exemption from providing workers' compensation insurance.

The undersigned swears or affirms that he/she is not required to provide workers' compensation insurance under the provision of Pennsylvania's Workers' Compensation Law for one of the following reasons, as indicated:

Contractor with no employees. Contractor prohibited by law from employing any individual to perform work pursuant to this building permit unless contractor provides proof of insurance to the township.

Religious exemption under the Workers' Compensation Law.

Subscribed and sworn to before me this

_____ day of _____, 20____

(Signature of Notary)

I verify that my responses to these questions are true and correct to the best of my knowledge, information and belief. I understand that false statements are subject to the penalties of 18 Pa C.S.A., Section 4904 relating to unsworn falsification to authorities.

Signature of Applicant
TO BE SIGNED IN PRESENCE OF NOTARY

APPLICATION FOR PLAN EXAMINATION AND BUILDING PERMIT

IMPORTANT - Applicant to complete all items in sections: I, II, III, IV, and IX.

I. LOCATION OF BUILDING	AT (LOCATION) _____	(NO.) _____	(STREET) _____	ZONING DISTRICT _____

Don't Let Storm Water Run Off With Your Time and Money!

What the Construction Industry Should Know About Storm Water In Our Community

The construction industry plays an important role in improving our community's quality of life by not only providing new development, but also protecting our streams and rivers through smart business practices that prevent pollution from leaving construction sites.

Storm water runoff leaving construction sites can carry pollutants such as dirt, construction debris, oil, and paint off-site and into storm drains. In our community, storm drains carry storm water runoff directly to local creeks, streams, and rivers with no treatment. Developers, contractors, and homebuilders can help to prevent storm water pollution by taking the following steps:

1. Comply with storm water permit requirements.
2. Practice erosion control and pollution prevention practices to keep construction sites "clean."
3. Conduct advanced planning and training to ensure proper implementation on-site.

The remainder of this fact sheet addresses these three steps.

Storm Water Permit Requirements for Construction Activity

Planning and permitting requirements exist for construction activities. These requirements are intended to minimize storm water pollutants leaving construction sites.

- Pennsylvania's Erosion and Sediment Pollution Control Program (25 Pa. Code, Chapter 102) requires Erosion and Sediment Control Plans for all earth disturbing activities.
- The National Pollutant Discharge Elimination System (NPDES) Permit Program (25 Pa. Code, Chapter 92) requires that construction activities disturbing greater than one acre submit a Notice of Intent for coverage under a general NPDES permit.

Knowing your requirements before starting a project and following them during construction can save you time and money, and demonstrate that you are a partner in improving our community's quality of life. For more information about these programs, contact your local county conservation district office or the Department of Environmental Protection.

What is Storm Water?

Storm water is water from precipitation that flows across the ground and pavement when it rains or when snow and ice melt. The water seeps into the ground or drains into what are commonly called storm sewers. These are the drains you see at street corners or at low points on the sides of streets. Collectively, the draining water is called **storm water runoff**.

Erosion Control Practices:

- Perimeter controls (e.g. silt fence)
- Sediment traps
- Immediate revegetation
- Phased, minimized grading
- Construction entrance
- Protection of streams and drainage ways
- Inlet protection

An Ounce of Prevention

Rain that falls onto construction sites is likely to carry away soil particles and other toxic chemicals present on construction sites (oil, grease, hazardous wastes, fuel). Storm water, if not properly managed, carries these pollutants to streams, rivers, and lakes. Erosion and sediment control practices can serve as a first line of defense,

Pollution Prevention Practices:

- Designated fueling and vehicle maintenance area away from streams.
- Remove trash and litter.
- Clean up leaks immediately.
- Never wash down dirty pavement.
- Place dumpsters under cover.
- Dispose of all wastes properly.

minimizing clean up and maintenance costs, and the impacts to water resources caused by soil erosion during active construction. Erosion controls can reduce the volume of soil going into a sediment control device, such as a sediment trap, therefore, “clean out” frequencies are lower and maintenance costs are less. When possible, divert water around the construction site using berms or drainage ditches.

In addition, use pollution prevention and “good housekeeping measures” to reduce the pollution leaving construction sites as well. This can be as simple as minimizing the pollution source’s contact with rainwater by covering it, maintaining a “clean site” by reducing trash and waste, and keeping vehicles well maintained.

The Best Laid Plans

Plans such as erosion and sediment control plans and storm water pollution prevention plans are important tools for outlining the erosion control and pollution prevention practices that you will use to manage storm water runoff prior to breaking ground. Developing good plans allows for proper budgeting and planning for the life of the project. Proper installation and maintenance of erosion and storm water controls is essential to a plan that works. Training for on-site staff helps to ensure the proper installation and maintenance of erosion controls and pollution prevention practices. Inspect controls and management techniques regularly to ensure they are working, especially after storm events. If polluted storm water is leaving the site, you may need to repair or add additional storm water controls.

The Bigger Storm Water Picture

Your community is preventing storm water pollution through a comprehensive storm water management program. This program addresses storm water pollution from construction, but it also deals with new development, illegal dumping to the storm sewer system, and municipal operations. It will also continue to educate the community and get everyone involved in making sure the only thing that storm water contributes to our streams is . . . water! Contact your community or the Pennsylvania Department of Environmental Protection for more information about storm water management.
